Primo Lights Assembly Instructions

1. Connecting the socket inside the two poles.

Insert the wire plug from the lower pole into the upper pole socket. Note: make sure the wire plug is fully inserted into the socket.

2. Connect the two poles, Opening and closing the umbrella

Press the button on the upper pole and push the lower pole until the push button snaps into position. Now, insert the frame into the umbrella base (sold separately) and tighten the thumbscrew on the base tube.

To open the umbrella, turn the crank clockwise.

To close the umbrella, turn counterclockwise.

3. Tilt functions

Press the button on the tilt control with one hand; use the other hand to move the frame to the right or left. See the pictures below.

4. How to use the lighting system

Plug one end of the transformer into the Power Supply and the other end into the socket on the lower pole (see photo).

Push “---” on the switch to turn on the star lights, press “o” to turn off.
